## **HORSE TRAILER FEEDER WINDOW**

**0280/0281 SERIS**

**WITH PULL BAR LOCK RELEASE**

An economical radius cornered, flush mount feeder access for slant load horse trailers. The feeder window is a bottom T-Slider (*shown below*) with stationary panes at the top.

The window features a **drop-down safety bar system & pull bar lock release mechanism which allows opening of the window by pulling downward at any point on the pull bar.**

Safety spin nut for locking mechanism prevents accidental lock release. Also available in the one key system for all locking.

Back frame radius: 3.188". Available in durable black frame finish.

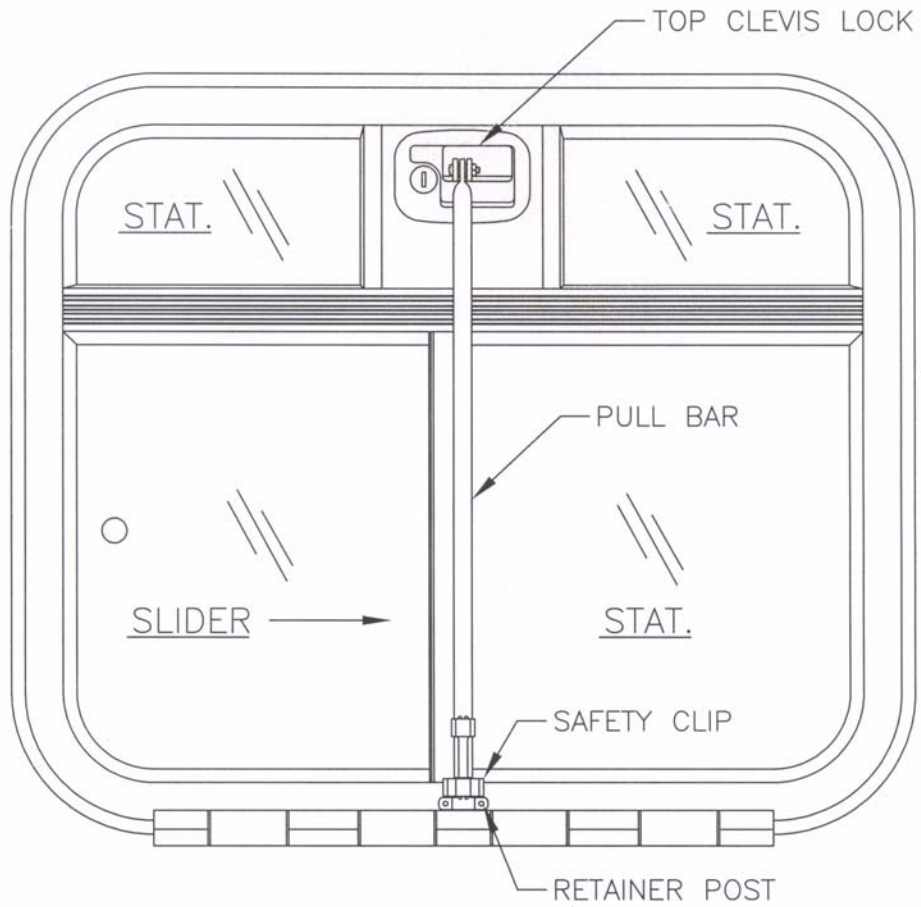

Window corner radius: 3 3/16"; Rough opening radius is 3 3/8" (3/16" clearance).

Window mounts to the wall using an interior clamp ring. Rings are available for all common wall thicknesses.

Allow for compressed thickness of your flange seal when ordering.

Drop-down safety bar system & pull bar lock release mechanism. Sliding panel has an outside pull knob. It can be latched from inside for weather security.

Window can be re-glazed without removing from the trailer.

**To place an order or for more information, please consult with your Hehr Sales representative.**
